ABSTRACT

This report presents statistical and historical data on Mississippi's community and junior colleges for 1997-98. The first section provides a list of state board members and board staff, a directory of community and junior colleges in the state, a map of college districts, a schedule of college board of trustees meetings, and a brief foreward. The second section presents data on enrollment in the state's public community and junior colleges including 10-year enrollment trends from 1988-1997, and credit and total enrollment by institution by campus, non-credit enrollment by college, credit enrollment by county by college, and credit enrollment by race by college for fall 1996. Between 1988 and 1997, total credit enrollment increased by 22% and overall enrollment doubled. The third section highlights 1997-98 system finances, including a comparison of revenue by source and expenditure by program, as well as data on county tax support, student fees and charges per semester, education and general expenditures by function and object, auxiliary enterprise revenues and expenditures, and expenditures per full-time-equivalent student by function. The final section features data on degrees awarded in 1997-98, academic faculty salaries for 1998-99, the 1998 learning resources survey, and dormitory utilization as of fall 1997. (AS)

| State Board for Community and Junior Colleges | 10 | 3rd Friday | 9:00 a.m. |

## FOREWORD

As the first state to establish a system of public community colleges, the state has fifteen comprehensive community college districts which provide educational programs and services that are accessible to virtually all Mississippi citizens. This has been a goal of these two-year institutions since the first one began admitting students in 1922. All public community colleges are accredited by the Southern Association of Colleges and Schools and the Mississippi Commission on College Accreditation.

This network of institutions operates both university transfer and occupationally-oriented programs. Over sixty percent of the Mississippi high school graduates who attend college do so at the community colleges. A student may transfer earned credits to four-year institutions without loss of credit if the student has followed the recommended course of study. Studies reveal that community college transfer students perform at a par with the native student at four-year institutions.

Community colleges are the primary delivery mechanism for post-secondary occupational programs in Mississippi. These programs of two-years or less duration are designed to prepare students for immediate employment and for upgrading skills of those currently employed. Training programs in more than one hundred occupational skills are provided by the schools. Community colleges also provide a variety of continuing education, community and public service activities. The institutions are funded by state appropriations, local district taxes, student fees and federal grants.

A characteristic of Mississippi's community colleges is their flexibility to respond to needs of a given segment of the state's society. This sensitivity is the result of an administration and a board of control operating at the local level. Each college district has a local governing board which employs the president and faculty, owns property, establishes budgets for operation and capital improvement, and sets policies for the general governance of the institution. Cooperation by the various institutions on state-wide endeavors is accomplished through the Mississippi Community and Junior College Association, a voluntary organization of the institutions represented by their presidents.

State coordination and oversight is provided by the State Board for Community and Junior Colleges, which on July 1, 1986, was named successor to the Junior College Commission. With regard to the system of community colleges, the State Board establishes standards for operation, administers state appropriations, approves vocational and technical programs and attendance centers, assembles reports, and provides general coordination. The State Board of Education (K-12) serves as the State Board for Vocational Education, and through its Bureau of Vocational and Technical Education administers programs on the secondary and post-secondary level.
